

DeKalb County Commissioners
100 South Main St.
Auburn, IN 46706

The DeKalb County Commissioners, Attorney, Auditor, Information Technology, and Emergency Management continue to work with outside contractors regarding our computer system. We are working diligently to restore our computer operating system. Unfortunately, we do not have a restoration date established yet. We do know computer systems will not be operational tomorrow, Monday, September 29, 2025.

Central Communications and our 911 emergency system are still operational. To ensure Public Safety needs are addressed for Law Enforcement, Fire Department, and EMS requests for service.

As we continue to work on our computer systems know that we strive to bring our departments back to normal operations as quickly as possible. We continue to maintain a mission of proactive service delivery to the public and our employees to the best of our ability with public safety being our number one priority.

Thank you for the continued patience and support as we work with outside contractors to restore our DeKalb County Government computer services.
