City and County District Maps

Please visit DeKalb County's [Beacon Website](#) for the following district information:

> County Commissioner's Districts
> County Council Districts
> City Council Districts
> Voting Precincts
> Voting Locations

How to use Beacon:

Click on the district or precincts layers found under the **Civic/Government** group in the table of contents to turn them on. To identify areas on the map, activate the layer you want to identify by clicking on the layer. After you have activated the layer, click the [ℹ] tool and click on a feature you'd like to identify or draw a rectangle around multiple features.

You can also use the site to determine the district or precinct in which a home is located by searching for the address on the search tab then switching to the map tab and turning on the district or precinct layers.
